Mrs. David Fearing, chairman of the Art Department, will be in charge of arrangements for an art program on the evening of April 6th. A very fine booklet entitled "The Intelligent Woman's Guide to Art" by John Canaday, art editor and critic of the New York Times, has been sent to the club from the office of The General Federation of Women's Clubs for distribution to members. This excellent booklet concerns the great need for the general advancement of culture in America and a new method of home instruction in art which the Metropolitan Museum of Art in New York selected Mr. Canaday to carry out, under its supervision, and called "Home Seminars in Art".

The annual dinner meeting will be held in May. Mrs. Timothy O'Brien will be in charge of arrangements for the club dinner meeting. An all-day meeting will be held on June 1st with a covered dish luncheon at noon. Mrs. Albert Hellyer and Mrs. Greenwood Hartley, Sr. are hostesses for this.

WOMAN'S CLUB HEARS TALK ON MARINE LIFE

The Sippican Woman's Club held its January meeting on Friday, January 8th, at the clubhouse in Marion. Following the business meeting, conducted by the president, Mrs. Clayton Keith, the members listened with interest to a talk given by Colonel Eugene S. Clark of Sandwich describing the many forms of marine life on the shores in this region. His talk was illustrated with colorful pictures. The hospitality committee with Mrs. E. Leslie Goodwin, chairman, assisted by Mrs. Edward Butt, Mrs. A. C. Boardman, Mrs. Howard Ellis and Mrs. Maud Lusk, served tea. Mrs. Thayer Francis and Miss Amy Brewer poured at the attractive table.

Mr. Everett Hardy is institutional representative for the club. The annual awards' banquet will be held in May.

An excellent report was given by Mrs. Kenneth Winslow, chairman of the veterans' committee. She reported on the Christmas bags sent to the Brockton VA Hospital and announced the project for 1960 would be to make a large afghan and all members are asked to participate. These afghans are very much needed in the veterans' hospitals and greatly appreciated.

A coffee hour followed the business meeting with Mrs. Ethel Gary and Mrs. C. Clifford Pierce serving as hostesses.

FORMER MATTAPOISETT DOG PICKED UP FOR VAGRANCY

Laddie, a dog belonging to Mr. and Mrs. James I. Brackett, Jr. of Seekonk, formerly of Church Street, Mattapoisett, was noticed hanging out on a street corner of Seekonk, Mass. recently. The lady who lived there noticed his Mattapoisett license and phoned the Seekonk police. Laddie was picked up and spent the night in jail. The Seekong dog officer called the Mattapoisett police and told them that a Mrs. Heuberger called them about this dog. She saw the Mattapoisett license and said, "I'll bet this dog belongs to a Heuberger in Mattapoisett as the town is full of them". She is distantly related to the Mattapoisett Heuberger family.

The police in Mattapoisett proved so helpful in locating Laddie's new address for the Seekonk dog officer that he waived all charges. "Professional courtesy", he said.

Laddie is home and happy, we hear, and has refused to comment on his police record.

INCORRECT USE OF AIR RIFLES BY ROCHESTER YOUNG

Rochester Police Chief Elmore G. Howes has received complaints concerning the incorrect use of air rifles by youngsters in Rochester. To inform parents in instructing their children as to the use of air rifles Chapter 269, section 12B of the General Laws, Commonwealth of Massachusetts relating to the use of air rifles and so-called BB guns, is as follows:

"No minor under the age of eighteen shall have an air rifle or so-called BB gun in his possession while in any place to which the public has a right of access unless he is accompanied by an adult or unless he is the holder of a sporting or hunting license and has on his person a permit from the chief of police of the town in which he resides granting him the rights of such possession. JUST AN AFTERTHOUGHT

The Communists have a magnificent world press. The boasts, threats, blusters and bombasts of Nikita Khrushchev are pounced upon like pearls and strung around the world like a verbal garrote, strangling the truth. Even in the United States this is so. The boasts of a fantastic new Russian communist weapon was a page one lead story for us and for the rest of the people on this planet. This boast might be truth and might be fiction and yet the world press roars and world' readers tremble. At the very same time, two **solid** achievements by the United States have hardly leaked out even in this country. We, the United States, recently commissioned a truly fantastic new weapon. We can have no doubt that this warship named the George Washington has been noted well in Russia. We have in the George Washington, a submarine capable of the underwater launching ballistic missiles to targets in almost all the areas under Communist influence and control. We have a ship of such endurance that it will operate by changing crews. This boat will cruise underwater at startling speed and is capable of aircraft type maneuvering. It can dive to great depths. It is a moving launching platform for ballistic missiles, limited only by the vast areas of the sea, almost impossible to find, ready at any moment to defend the United States. Propaganda wise this achievement doesn't compare with the first sputnik but in the military sense this is an effective weapon. Even though the world press might give it only passing note, we may be certain that it is sensational news to the Soviet high command. The Russians have the largest submarine fleet in the world. There have been reports recently that they have stopped production on subs. It is well within the limits of possibility that they are working harder to duplicate our underwater feats than we are to duplicate their space achievements. Even without the fanfare, the George Washington is a great feat of engineering. May we have many more just like her. Here is a missile base that will not be knocked out. A retaliatory weapon, when we have more, that will cover the Communists from every **sea**.

There are two achievements; one is the George Washington, the other is the recent Navy record dive into the deepest depths that man has ever penetrated. The sea occupies

most of the area of the globe. The more we learn of the sea, the more we learn of the survival of the human race. Man must inevitably learn to farm the ocean just as we farm the land at the present time. As the population of the world increases, we will need all the resources of the earth to feed and to clothe these people. These little noted deep dives by the Navy may well be as important in the near future as the conquest of space.

POINT CONNETT SUMMER RESIDENT WED IN NEEDHAM
